## PROJECTS PORTFOLIO

### Web insurance app

Used technologies:

Java, Spring Boot , Hibernate, PostgreSQL, Html, Css ,Javascript

This is a full-stack web application that includes registration, login, and user verification functionalities. After successful login, users are redirected to an endpoint where they can access information from the database, categorized for easy navigation. Additionally, users have access to features such as a liability insurance calculator.

### Contact manager, console app in Java

The application includes basics of OOP principles such as inheritance, polymorphism, abstraction, and encapsulation. Users can add new contacts, view a list of existing contacts, and edit them. Additionally, the application offers search functionality, allowing users to search for contacts by entering a query or phone number.
